

Tushar Umesh Basugade

Pune | tusharbasugade1234@gmail.com | 9975318329

Education

AISSMS College Of Engineering.	Dec 2021 – May 2025
- Percentage: 83.60 Coursework: Computer Engineering.	
Shri Balaji Junior College,Ichalkaranji.	Jun 2019 – May 2021
- Percentage: 90.67 Coursework: HSC	

Skills

Languages: C++,Python,JavaScript,SQL.
Frontend: HTML, CSS, Bootstrap, React.js, Redux.
Data/Analytics: Power BI, Pandas.
Version Control: Git, GitHub

Projects

My Portfolio Project Link

- Portfolio Overview: A showcase of my front-end development skills using HTML, CSS, and JavaScript.
- Projects Section: Highlights my work with detailed descriptions of the technologies used.
- Tools used: HTML,CSS,JavaScript,BootStrap.

Weather Forecasting Website Project Link

- Project Overview: A React-based application that provides real-time weather updates and forecasts for various locations, migrated from a vanilla JavaScript implementation to improve scalability and state management.
- Key Features: Displays current weather conditions, temperature, humidity, and wind speed, with saved favorite locations and a voice-readout feature.
- Tools used: React.js, Redux, JavaScript, HTML, CSS, Bootstrap, OpenWeatherMap API.

Skin Cancer Detection Using Deep Learning Project Link

- Project Preview: Developed a deep learning-based web application that detects and classifies skin lesions (e.g., melanoma) using the HAM10000 dataset.
- Key Features: The application uses EfficientNet (CNN) for high-accuracy image classification and provides a user-friendly interface built with Streamlit, allowing users to upload lesion images and receive predictions.It generates downloadable PDF reports and recommends nearby hospitals based on the user's location, offering a complete diagnostic support experience.
- Tools used: Python, TensorFlow, Keras, Streamlit, OpenCV, Pandas, ReportLab, Geolocation API(Openstreetmap).

Personal Stock Portfolio Dashboard Project Link

- Project Overview: An interactive Power BI dashboard tracking a personal stock portfolio using real, self-collected trading data, with live/current pricing fetched via API to reflect up-to-date holdings.
- Key Features: Built as two linked pages — a Current Holdings view and a Historical Performance view.
- Tools used: Power BI, DAX, Power Query, CSV/API data sources.
